

Module 3, Lesson 3 Tool:

Sources of Calcium in the Diet

Calcium plays many important roles in the body and is found in more foods than most realize. For people 19-70 years old, it's recommended to aim for a calcium intake of 1,000mg per day. Dark leafy greens, fish with bones and beans are just a few ways to boost your calcium intake with fresh food. Below are some more examples of the calcium content in specific foods.
